Pick your savings target and shoot straight for it!

A home . . . financial security . . . a business of your own. Important savings targets like these cost money—a substantial -and more than most of us have. But here's a sure way for you to score a bull's-eye and walk off with the big prize

The secret of saving is system. And the simplest, most automatic saving system ever devised is the Payroll Savings Plan. Best of all, you do more than save through Payroll Savings. You invest your money, too, and make it grow. Here's how it works:

Tell your company pay office how much you want to save each week. Then each pay period that amount will be put aside for you before you have a chance to spend it. Your money will go automatically into U. S. Series E Savings Bonds.

Because Savings Bonds earn good interest-3% compoundniannually when held to maturity (9 years and 8 months) they're soon worth much more than you've invested in them And your Bonds will continue to pay this same good interest as long as 19 years and 8 months. That means a return of up to 80% more than you originally paid.

And remember this. There's no guesswork or chance about the Payroll Savings Plan. It's absolutely safe and sure. Invest just \$7.50 a week. In 5 years you'll have Savings Bonds worth \$2053 in cash; in 10 years, \$4448.

Even if you've never been able to save before, this plan is guaranteed to work for you. So sign up today for Payroll Savings where you work—or invest in Bonds regularly where you bank.

PRESENT TREASURY REGULATIONS make it possible for you to collect a return of as much 80% on the Series E Savings Bonds you already own!

For now those Bonds which you invested in 10 years ago can go right on earning interest for ten more years without your doing a thing about it! That is true not only of the Bonds winch you have held for ten years, but any other feries E Bonds which you have invested in in the meantime. And any Series E Bonds which you obtain now will also enjoy the extended earning period. They will start earning interest sconer and mature earlier, too. paying 3%, compounded semiannually.

The Bond you got for \$18.75 can now pay you \$33.67 . . . a \$37.50 Bond will be worth \$67.34

Of course, any Series E Bond may still be redeemed at any time after you have held it for two months. But, like any other form of saving, your Bonds will mean a great deal

more to you if you can hold on to them.

Are you one of the millions of Americans who are saving regularly with Savings Bonds through the Payroll Savings Plan? If you're not, why not start now? Invest regularly in Bonds through the Payroll Savings Plan where you work. Ask your pay office to save as little as 25c a week for you, or as much as you are able.

If you can save just \$5 a week regularly through the Plan, in five years you will have \$1,367.90 . . in 9 years and 8 months, you'll have \$2,850.70 . . and in 19 years and 8 months, \$6,872.45! This Plan is one sure way to save because it saves something out of every check before you have a chance to spend it.

So join the Payroll Savings Plan where you work today. Or, if you are self-employed, start the Bond-A-Month Plan where you beak. It's safe, it's sure, it's automatic. And u will be helping yourself and your country!

If you want to be paid

ur interest as current income

invest in 3% Series H.

If you want a good, sound investment which pays you your interest by check every six months, ask at your bank about United States Government Series H Bonds, Series H is a new e rent income Bond available in den nations of \$500 to \$10,000. Redeem nations of \$500 to \$10,000. Redeemable at par after 6 months and on 80 days' notice. Matures in 9 years and 8 months and pays an average 3% interest per amum if held to materity. Interest paid semiannually by Treasury check. Series H may be purcha any bank, annual limit \$20,000.
